How it works

Delivery and collection

We deliver to and collect from any location within the UK. Delivery and collection is free within London Zones 1-5 with an additional fee outside this area. Need delivery or collection from an airport, hotel or residential address? Not a problem. Want the car to be picked up from a different location than it was delivered to? Just let us know when you book.

Verifying your licence and identity

Hate collection queues? So do we. For a seamless handover, we do an online licence check before your rental is confirmed. Complete this when it suits you from the comfort of your home.

You'll receive an SMS when our driver leaves for delivery or collection and another when they arrive. Your car will then be handed over to the main driver on the booking. Easy.

Quote process

To get a quote, please contact b motors ltd at booking@bmotorsltd.com

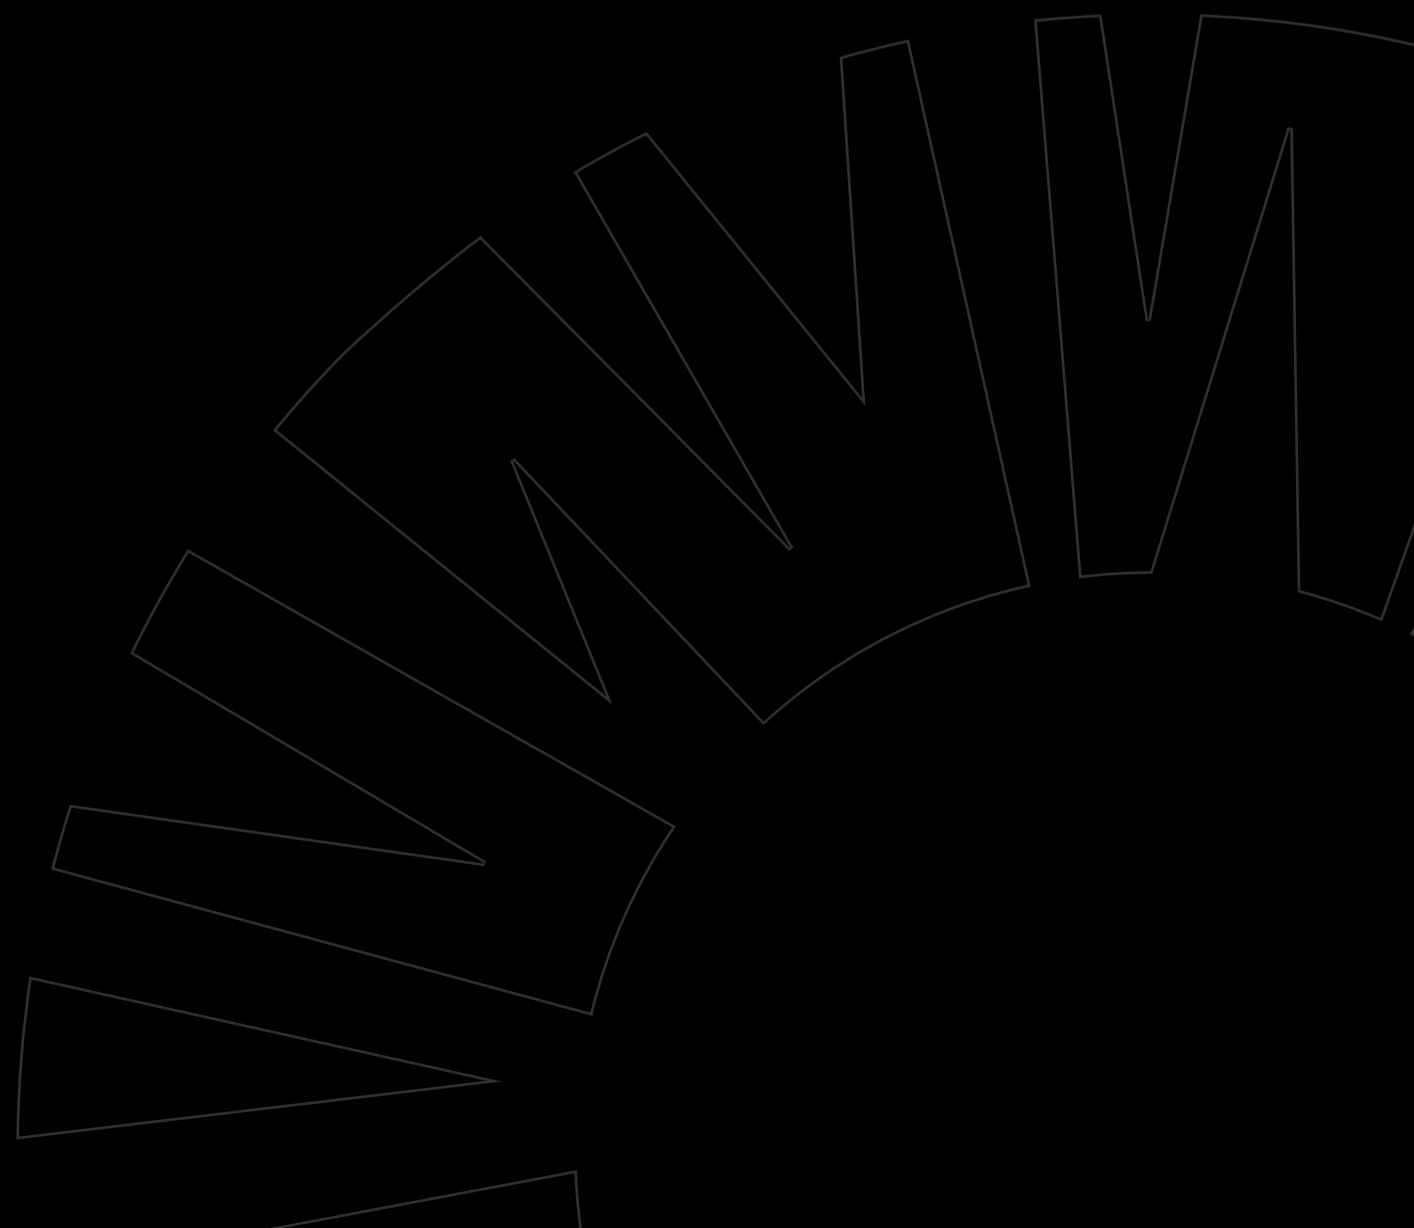

Land Rover

Discovery Sport

Stylish, tough and practical. A sophisticated drive that's slightly more compact than the Discovery. It's boxier lines create a spacious interior that's ideal for families, with space for seven.

Plenty of plush materials. Heating controls and classy touches, finished with a brushed-metal trim. Clever storage solutions and versatile boot space.

Land Rover

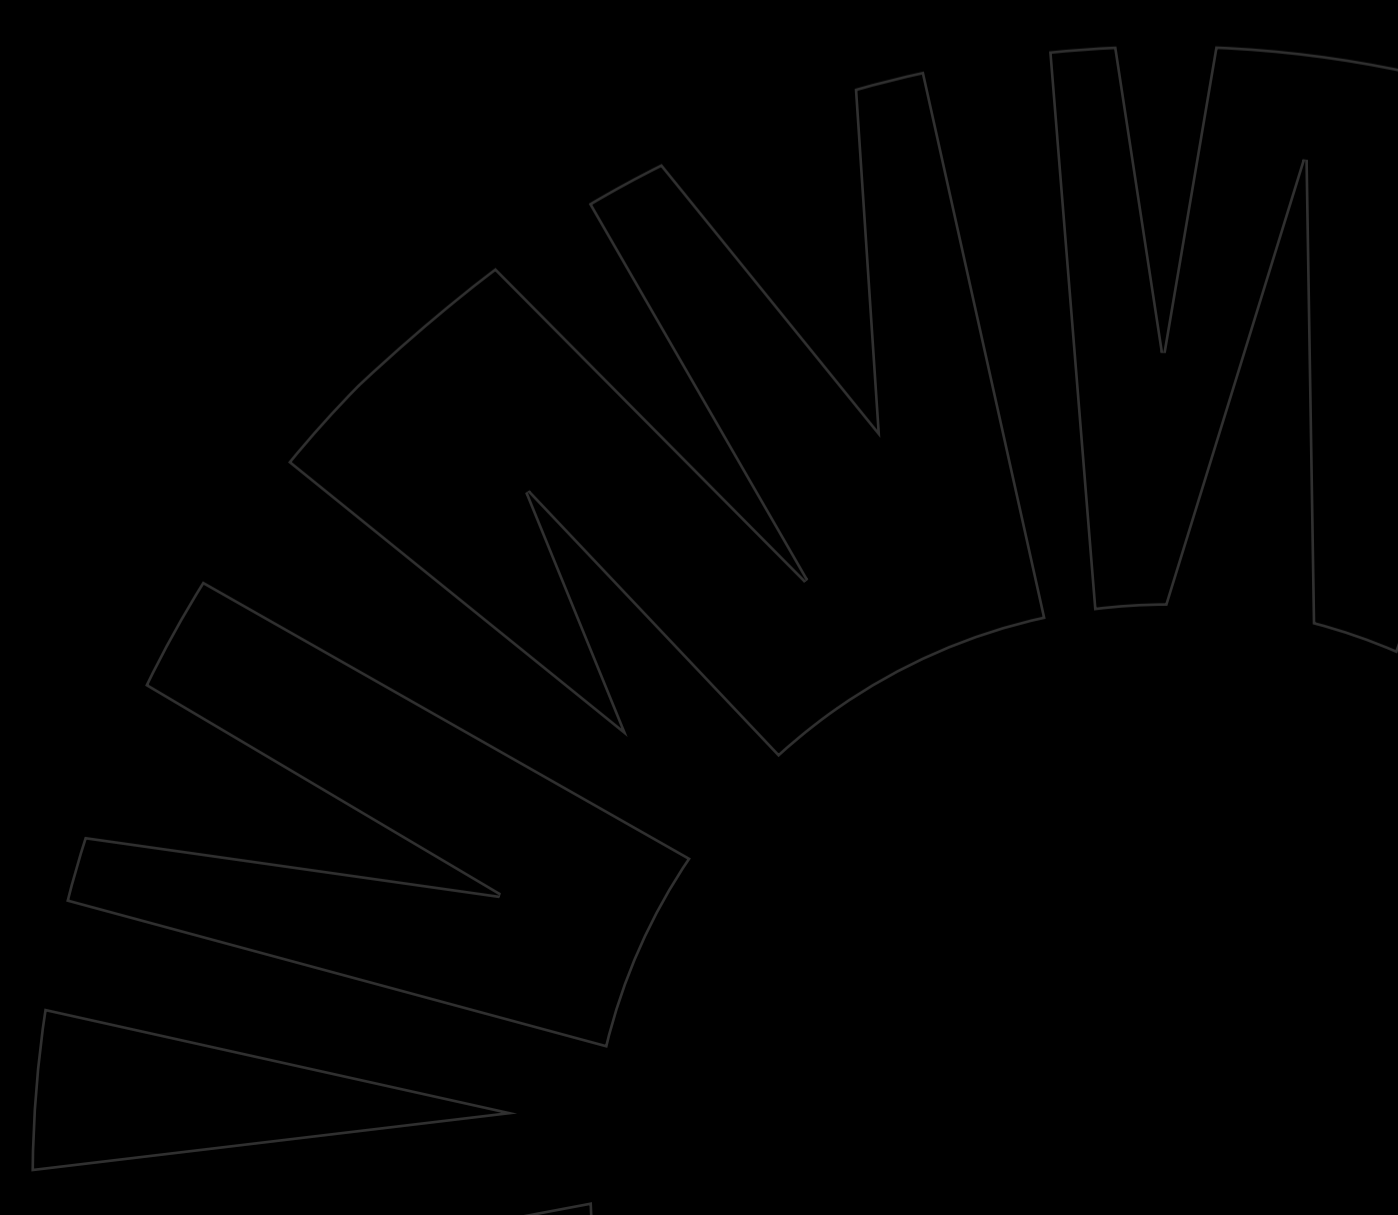

Range Rover Evoque

A car for cruising around cities. A mid-size 4x4 built for those narrow streets in town or those windy narrow country lanes in the Cotswolds.

A few inches smaller than other models, the fine essence of Range Rover is still evident throughout.

Uncluttered surfaces, best-in-class materials, maximised storage. And the technology is hard to beat. It can even learn where you want your seat positioned and how warm you want the cabin.

Jaguar

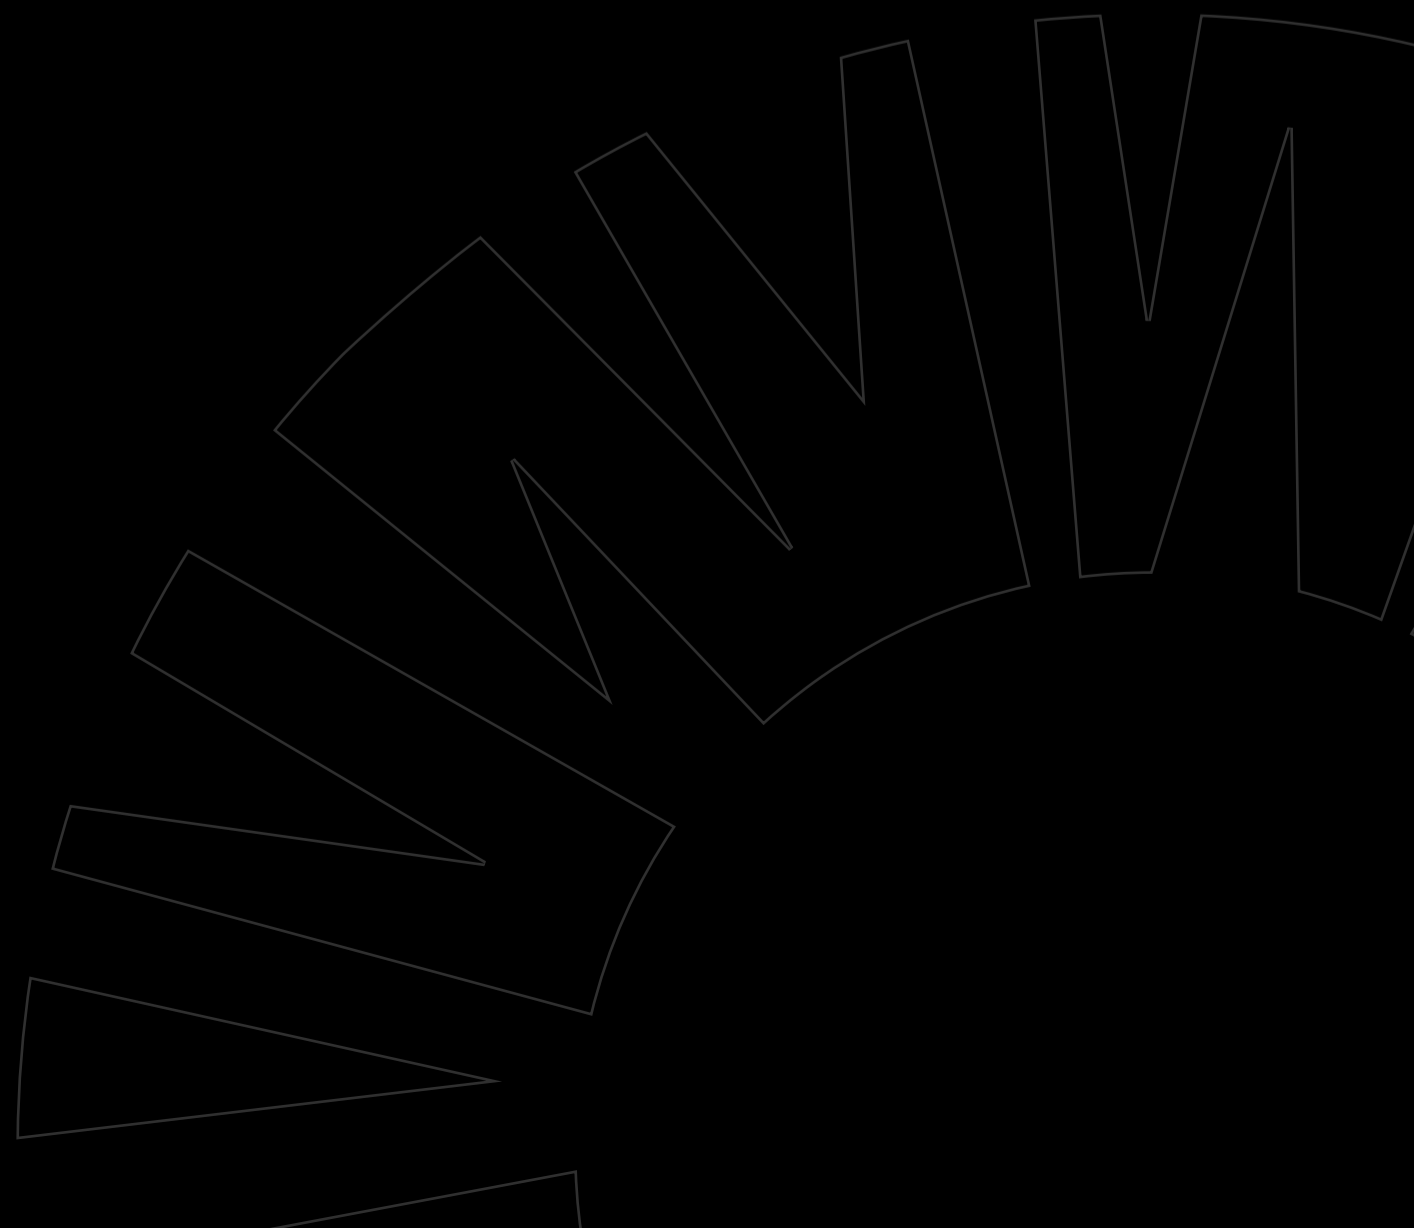

F-PACE

The practicality of an SUV with the oomph of a sports car. The Jaguar F-PACE looks slick but has generous space for all of your kit.

Drive it to the beach with your surfboard in the back if you fancy. It's a car ready for action. Like that raring-for-anything friend who manages to look effortlessly cool.

Sleek surfaces. Serious space. Hot-off-the-press technology. It can even look up the price of fuel on your route.

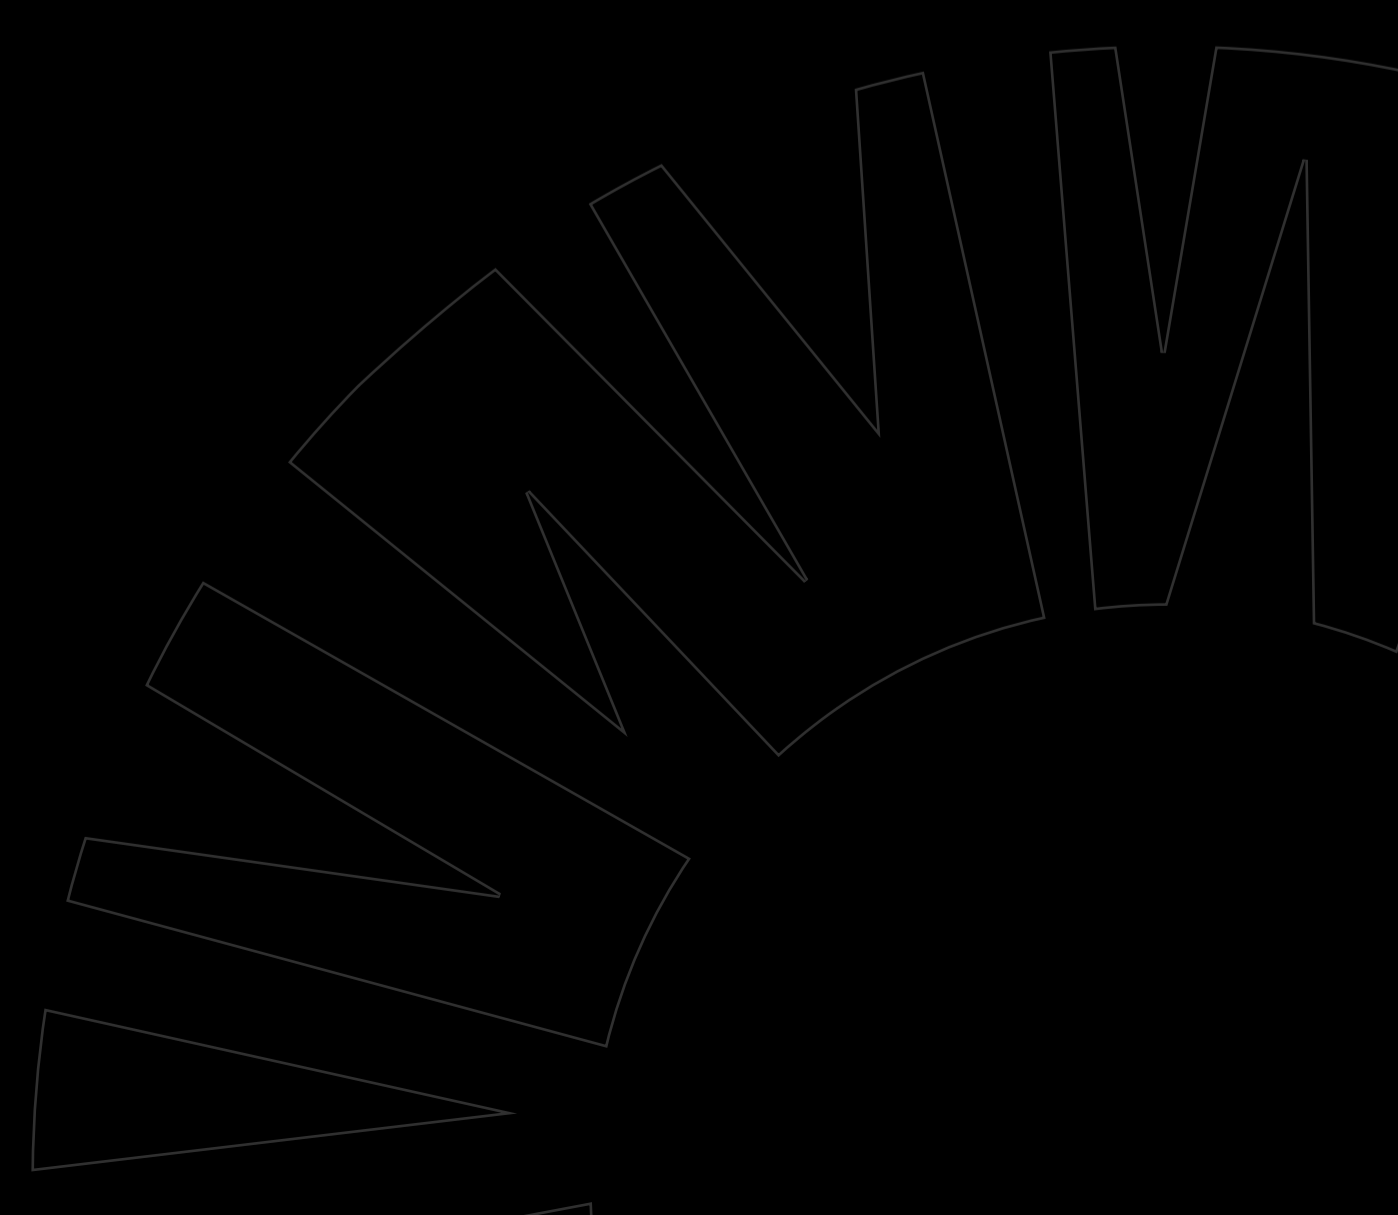

Jaguar

I-PACE

Space-wise, the I-PACE excels. The front wheels have been pulled forward so the cabin feels expansive. With a 656-litre boot that's twice the size of many smaller cars. And no engine means more space to relax.

The I-PACE is bold. A statement. Fully electric with a battery designed for longer rides and sustained high speed. Put your foot down on a long, open road and take the I-PACE from 0-60mph in 4.5 seconds. The slick power is totally addictive.

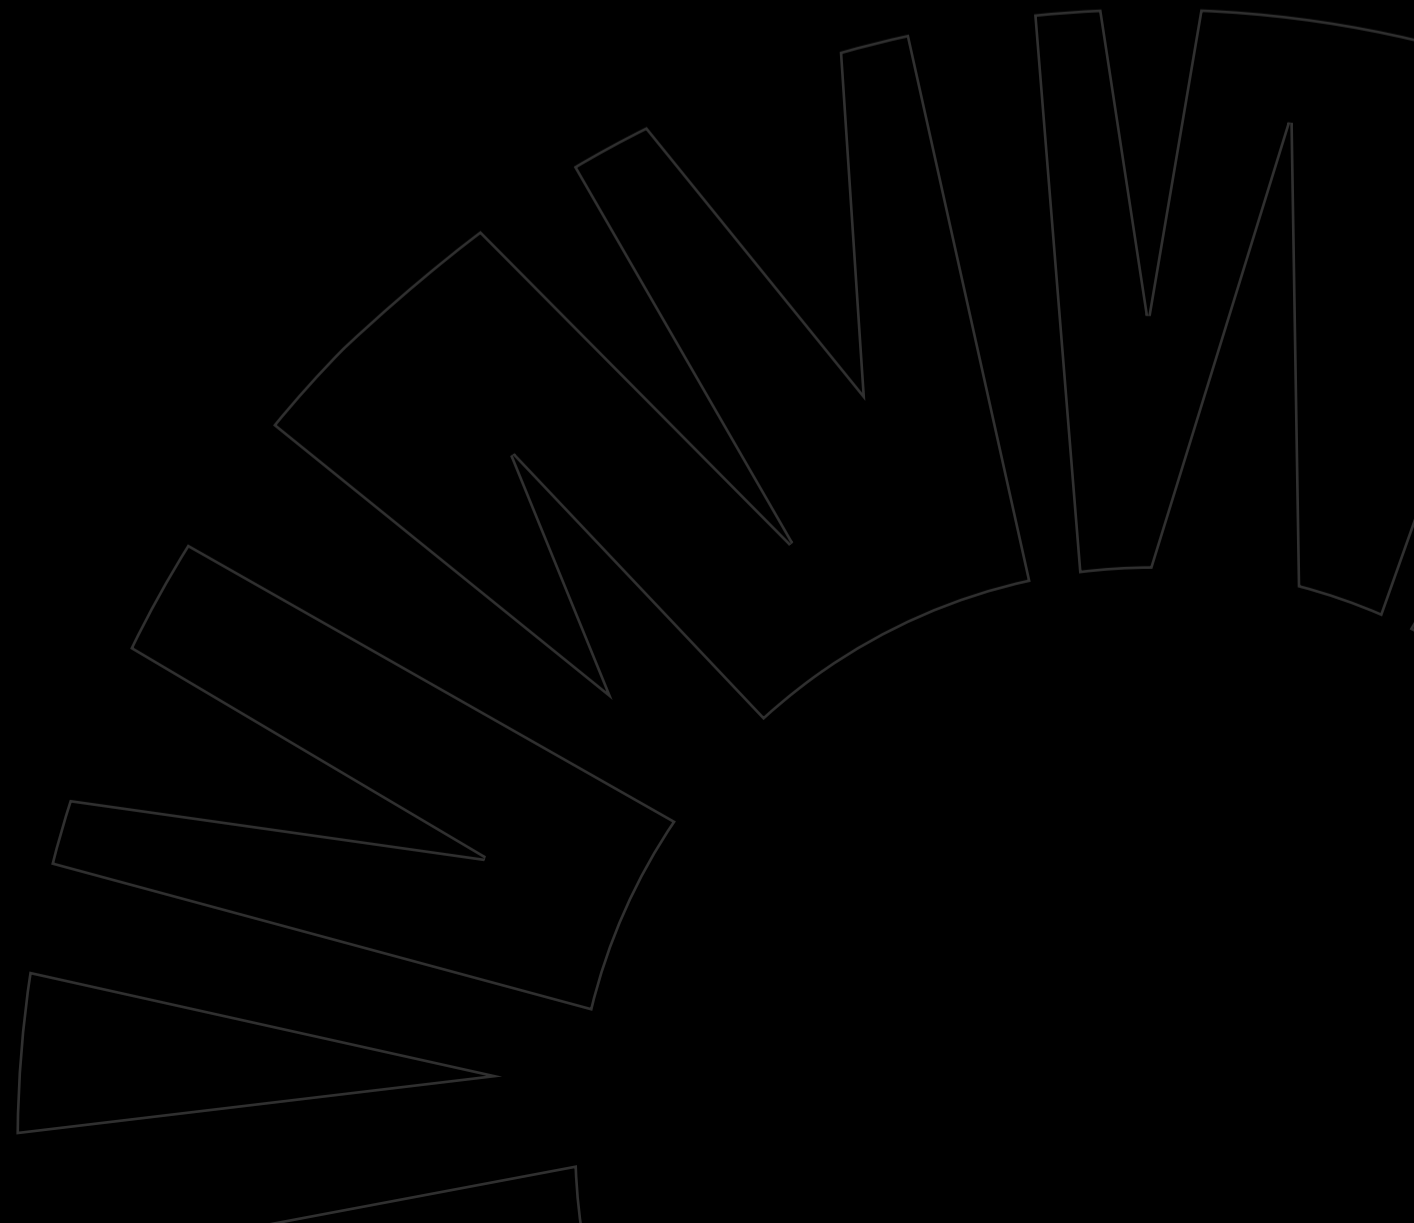

Land Rover

Defender 90

Known for its powerful capability, the Defender 90 is a force to be reckoned with. The younger sibling of the 110 is slightly smaller than its older brother, without compromising on any of the traditional features.

Sometimes cars get a bit dirty. That's life. This is a car you can muddy up and relax knowing it'll clean well, thanks to the high-quality, durable floors and wipeable seating.

Land Rover

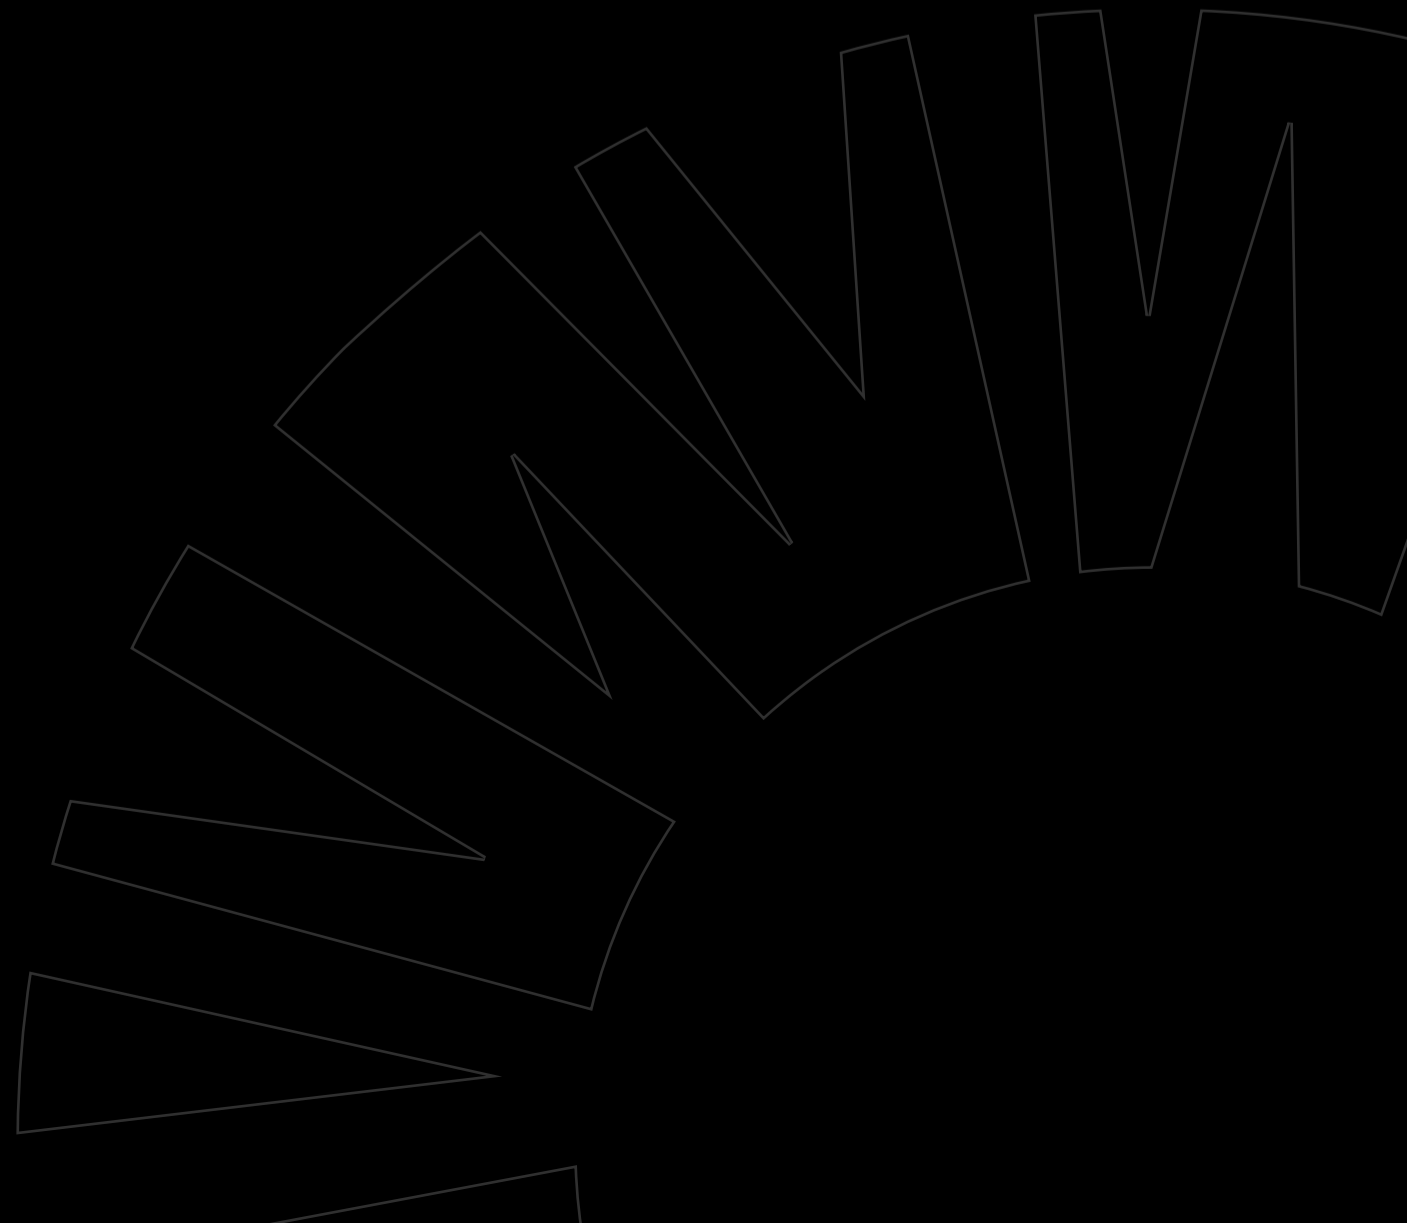

Range Rover Velar

It's one of those cars you just can't stop looking at. And you won't want to stop driving it either.

Put your foot down and race from 0 to 60 mph in 5.1 seconds. Or transition seamlessly from fuel to electric, driving for 33 miles in fully electric mode. It's both beautiful and more sustainable. Just like that friend who's good-looking and smart

Fresh and modern - where style meets function. There's soft seating, two infotainment displays and a glass roof. Oh, what a roof!

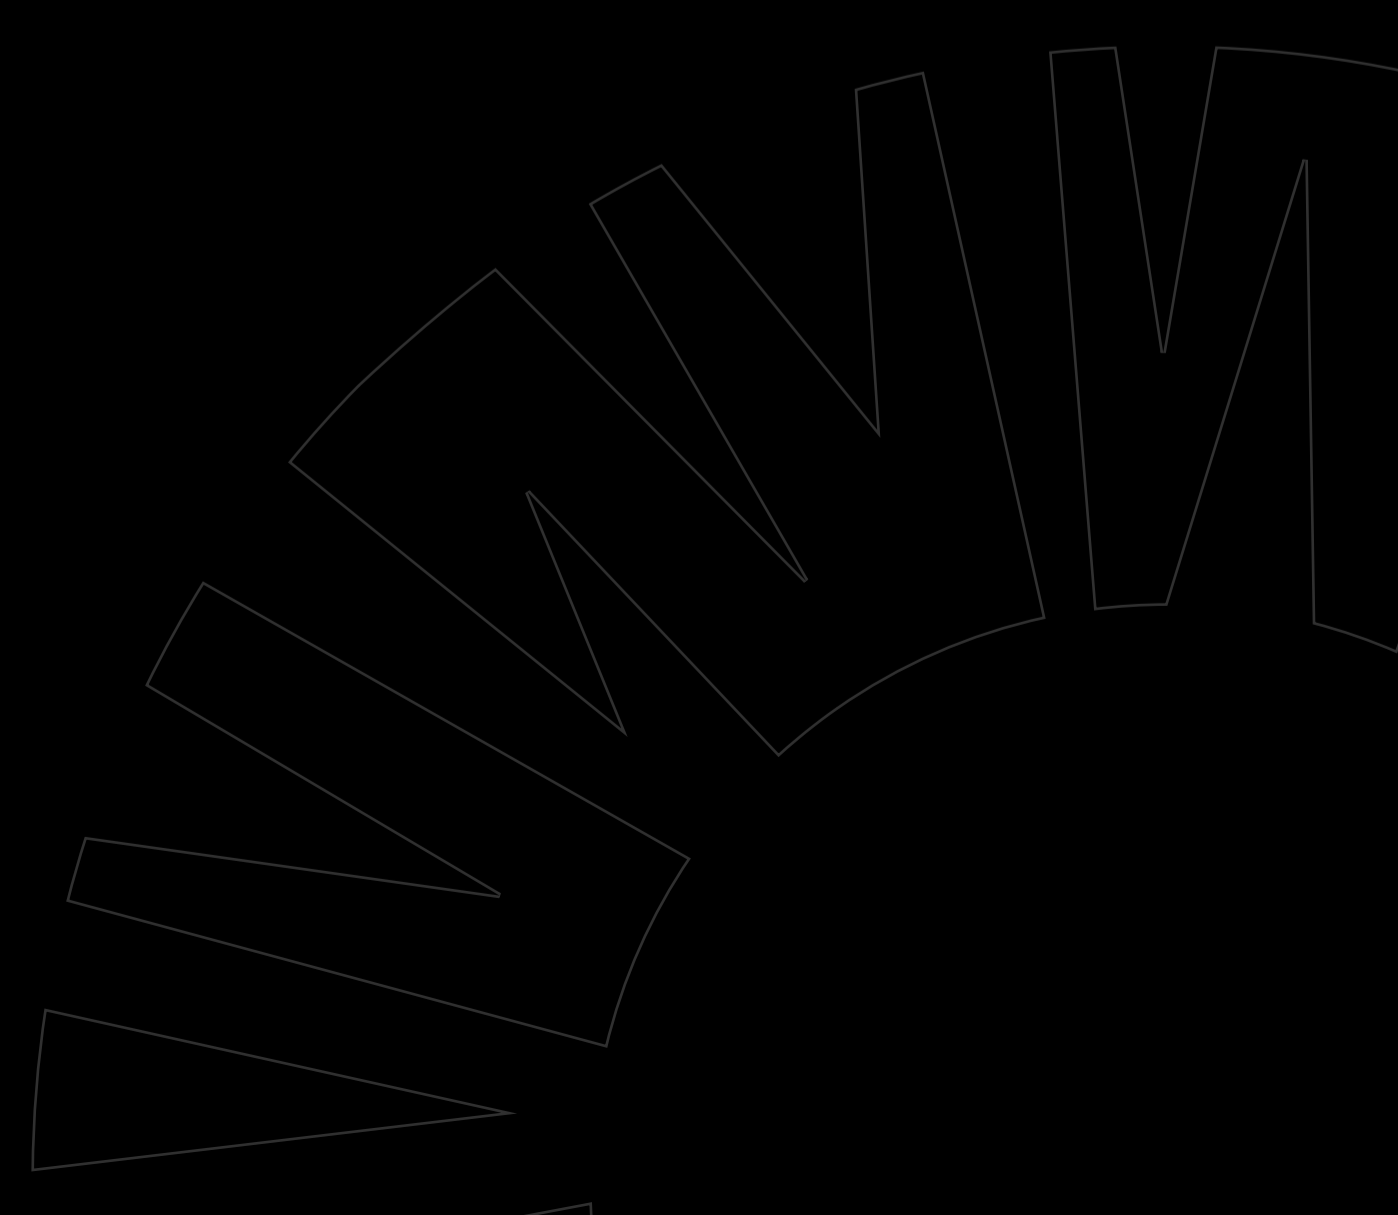

Land Rover

Discovery

A large 4x4 with serious versatility. It carries 7 adults in comfort from lunch in the city, to wet, bumpy roads on a weekend away. And all in absolute luxury.

Spacious seating with soft materials and high-grade leather. Ample head and foot room and an expansive windscreen for a perfect view of the road ahead. Fold all five rear seats to reveal one of the largest boots in the Land Rover family. So there's more than enough room for everyone's luggage for that long weekend away. And that means no more bags on laps!

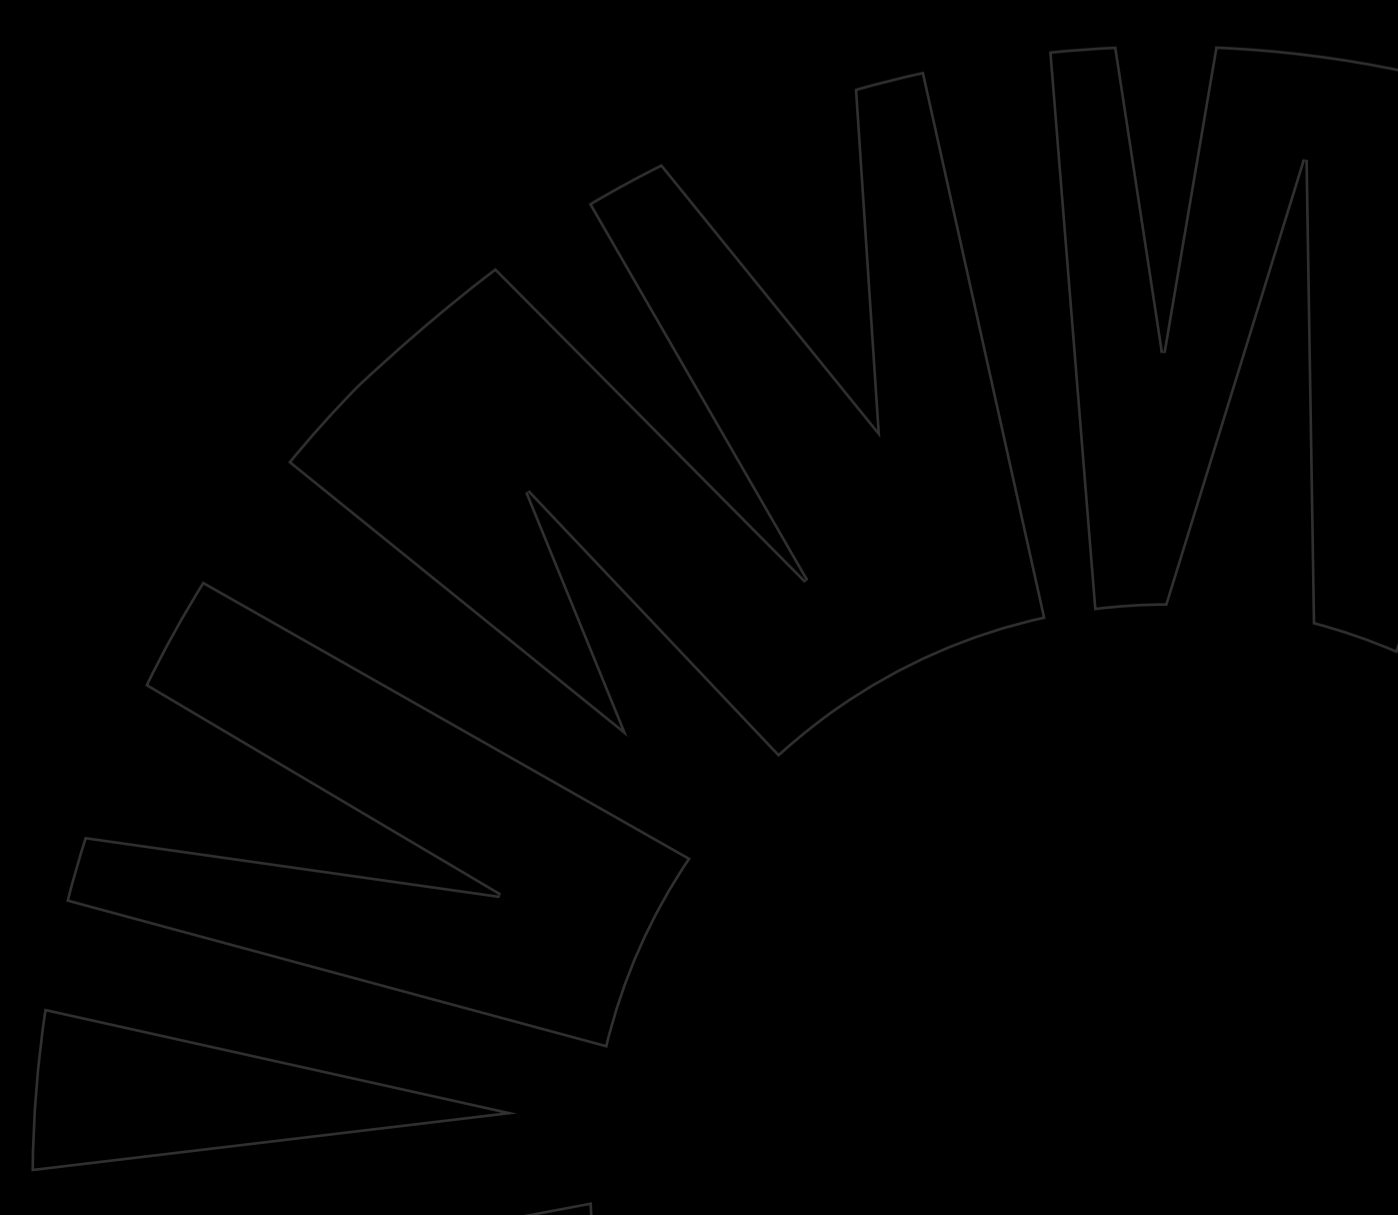

Land Rover

Range Rover Sport

It's the Range Rover Sport you know and love, with added environmentally friendly features. The PHEV (plug-in hybrid electric vehicle) is a 4x4 that uses fuel and electricity. You'll find driving on pure electric mode feels just as powerful as using the normal engine, making it an ideal combination of efficiency and performance.

Switch to electric for those short, city rides with a range of up to 20-30 miles. You'll notice how the car quietly breezes through the air. Or put your foot down to awaken the petrol engine and transition automatically.

Land Rover

Defender 110

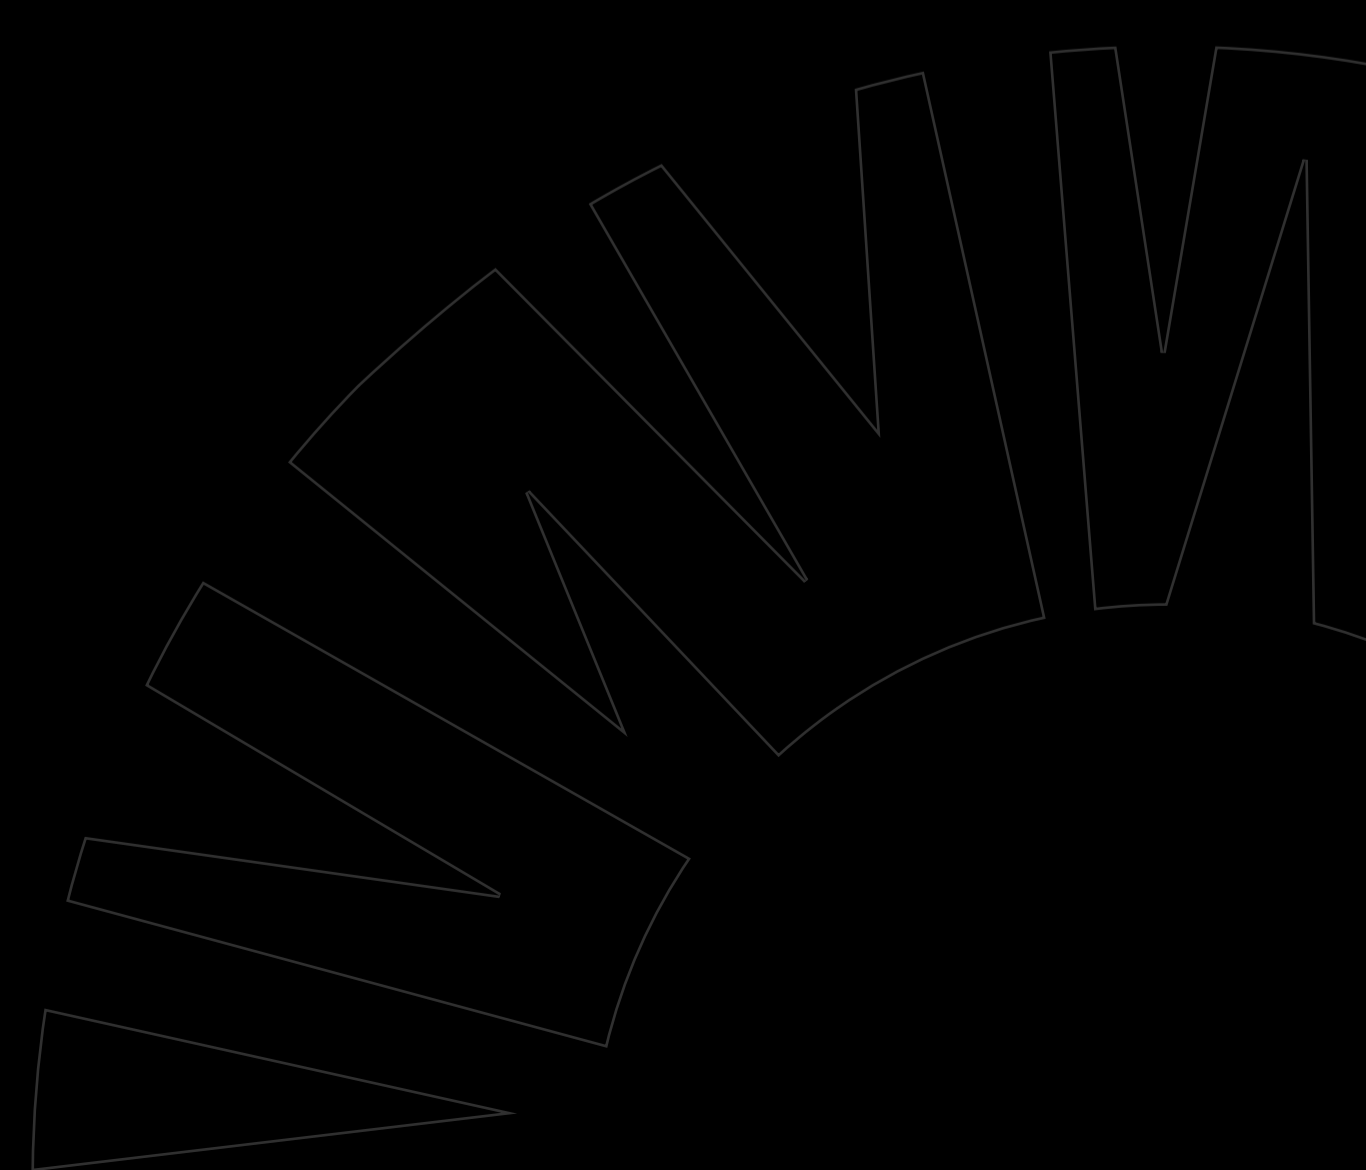

An updated Land Rover classic. The original design with new, subtle curves. Confidently taking you from bumpy terrain to city roads.

It's super-roomy too, with up to 7 seats and loads of rear legroom.

And it doesn't scrimp on the tech. It's infotainment system and driver aids are right up to modern premium-car standards.

Highly functional, versatile and sophisticated. Made with exposed bolts and plush interior finishes.

Jaguar

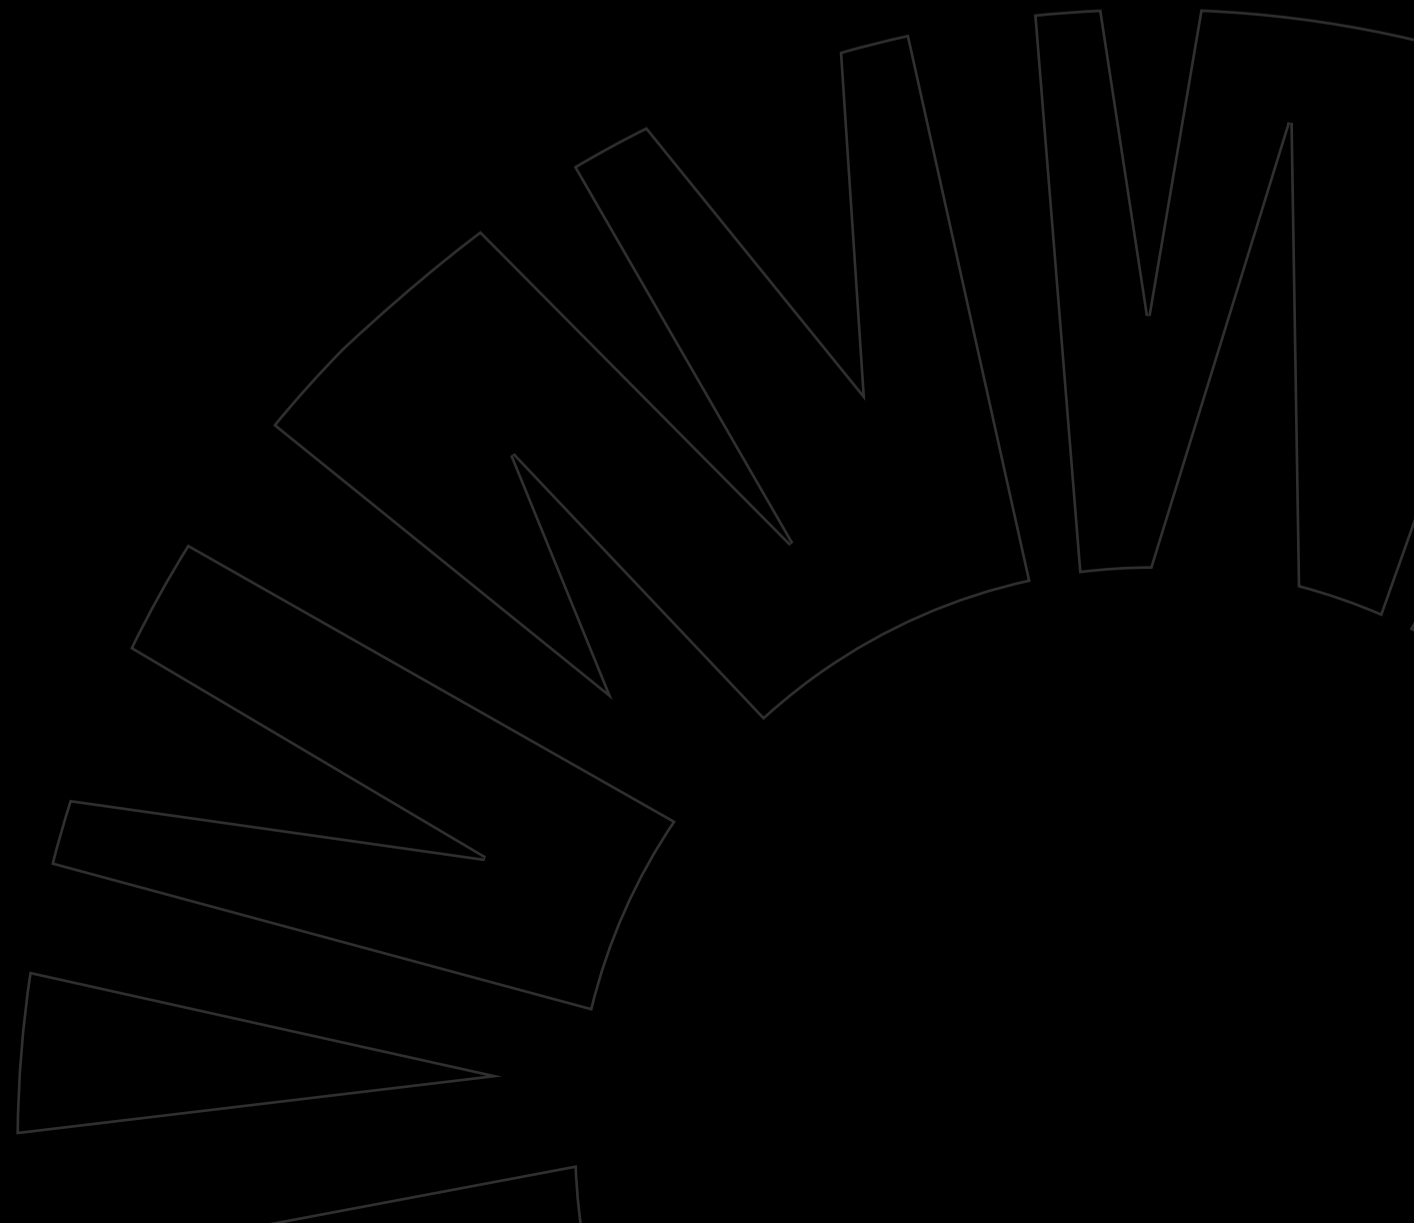

F-TYPE Convertible

It's athletic, lean and elegant. The rapid acceleration takes you from 0-60mph in 3.5 seconds and innovative technologies reduce CO2 emissions without compromising on power.

The F-TYPE combines responsive steering and a range of modes for agile driving, whatever road you take.

It's intimate and all about the driver, while comfortably fitting two people. The low, sporty seating position gives you that at-one-with-the-road feel. Get the perfect journey ambience with easy Apple and Android connection and a choice of five cabin lighting colours to suit your mood and destination.

Land Rover

Range Rover Autobiography

Unrivalled luxury, refinement and capability. Cruise around in this iconic car and experience a piece of classic, British heritage. It combines cutting-edge technology with the finest craftsmanship and elegance.

With executive size seats, extra leg room and ingenious storage solutions, the Range Rover is our most spacious, deluxe cabin yet.

A truly first-class travel experience. Top quality materials and impeccable finishes. The Range Rover's beautiful cabin features executive four seat comfort with five seat versatility. The rear seats have increased recline ability, deeper cushioning and climate control for enhanced comfort and wellbeing.
